Dethleffs classics

Reinvented three times over!

When Arist Dethleffs invented the “camper car” in 1931, he could hardly have imagined that he was not only creating a unique travel companion for his family, but also introducing an entirely new way to holiday. Camping surged in popularity during the 1950s and remains a favourite holiday choice for many to this day.

Inseparably linked to this legacy are the iconic names Camper®, Nomad and Beduin. For decades, these models have exemplified the renowned Dethleffs quality, crafted in the Allgäu region. The latest generation of these Dethleffs classics has been fully redesigned, once again embodying the pioneering spirit of Arist Dethleffs.

Welcome to the original!

The stylish touring caravan.

Travelling in style and comfort – this is the essence of the Nomad. The latest generation takes this concept even further, thanks to a sleek new design and a host of impressive features. With ten model variants, three upholstery options, perfectly coordinated styling packages and a wide range of additional equipment, the Nomad is the perfect choice for those who value individuality.

LIVING

Stylish living with a touch of elegance.

The living room of the new Nomad features warm wood furniture finishes that harmonise perfectly with the basalt-grey overhead locker doors and pebble-grey worktops, creating a sophisticated space where you can feel truly at home. The thoughtful lighting concept enhances this ambience, featuring indirect lighting above and below the overhead lockers and along the kitchen worktop, as well as a backlit kitchen rear panel.

- + Stylish, modern interior design
- + Streamlined furniture design with handle-free fronts
- + Comprehensive lighting concept with multiple indirect light sources
- + Elegantly designed corner elements with integrated storage options
- + Open shelves add a sense of freedom and create an airy feel

The elaborate lighting concept captivates thanks to a variety of different light sources, including illumination for the kitchen rear panel and the worktop. • 560 FMK | Olea

Enjoy life in the Nomad.

The fully equipped kitchen with ample (storage) space lets you enjoy gourmet holiday dining whenever you wish. The rimless kitchen covers add a touch of elegance. • 490 EST

Floating backrests, open shelves and stylish corner elements create a space full of lightness. The seating lounge can also be converted into an additional double bed if desired. • 490 EST | Lona

The sturdy pan supports exude top quality, and the burner spacing makes it easy to cook with a large pan and a pot at the same time.

Always within reach! Spices, canned goods and even large bottles can be neatly stored in the convenient kitchen pull-out (depending on model).

The spacious rear bathroom with a separate shower cubicle offers plenty of elbow room. The large window with a fly screen and blackout blind ensures proper ventilation after showering. • 490 EST

6

- 1 Incredibly practical – the 650 mm-wide entrance door with a window, blind and waste bin. It's also extremely secure, thanks to the Safelock system with two sturdy steel bolts.
- 3 Enjoy a good night's sleep! The 15 cm-thick 7-zone cold foam mattresses on ergonomic wooden slatted bed frames make it easy to get a great night's rest.
- 5 The Nomad's high-end design continues in the bathroom, featuring black fittings and a seamless sink with an integrated shelf.

- 2 Safe travels – thanks to the AL-KO-branded chassis with shock absorbers, self-adjusting AAA brakes and an anti-sliding coupling.
- 4 The gas bottle cover swings upwards in a space-saving parallel motion, so bicycles mounted on the draw bar don't need to be removed.
- 6 The spotlights on the power rails can be flexibly repositioned, as can the practical USB charging port.

Camping in every season

The Allgäu region is home to harsh winters – and it’s been our home since 1931! As we still have real winters, we mostly know what is especially needed for winter camping. All Dethleffs caravans are suitable for winter use as standard. For frequent use in icy and snowy conditions, we recommend our expertly crafted Winter Comfort Packages, designed to make your caravan truly winterproof.

Built on years of experience, this equipment ensures your caravan stays warm and cosy, even during the coldest nights, while preventing the water system from freezing.

A holiday home parked right next to the ski slopes, with a warm and cosy interior just like home!

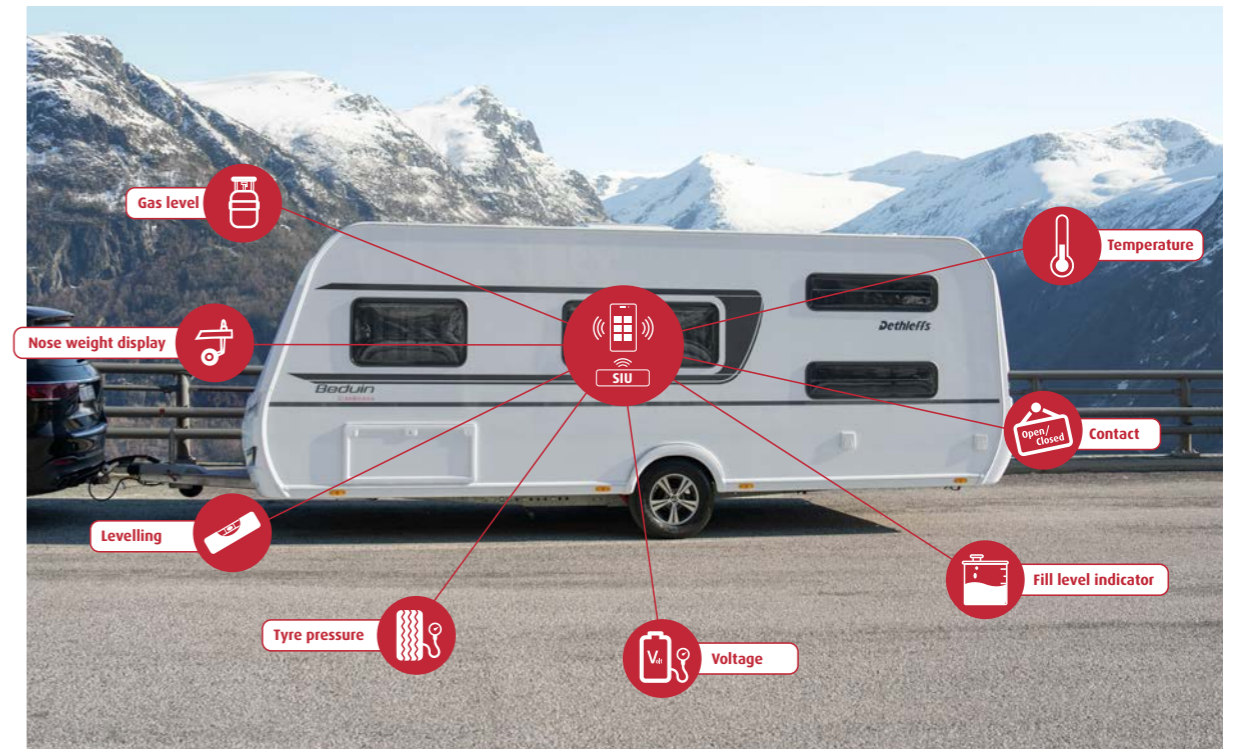

Stay safe throughout the cold season with a winterproof caravan equipped with the Winter Comfort Package from Dethleffs.

Enter the digital era

Standard in all Camper®, Nomad and Beduin Scandinavia models: the System Information Unit (SIU)! This digital information centre sends essential vehicle data straight to your smartphone via an app.

Thanks to the System Information Unit and the Dethleffs Connect app, you can transform your caravan into a digital information centre and keep an eye on important vehicle information at all times – via an app on your mobile phone or tablet. The levelling system and voltage display come pre-installed as standard, and additional sensors are available from Dethleffs Original Accessories:

www.dethleffs-original-zubehoer.com

Available sensors and their functions

- 
Gas level
 A sensor on the base monitors the gas bottle's fill level
- 
Nose weight display
 The correct support load is essential for driving stability – this is measured at the support wheel
- 
Levelling (standard)
 Provides a visual indication of whether the caravan is level
- 
Tyre pressure
 Sensors installed in the valve caps reliably measure the tyre pressures
- 
Voltage
 Displays battery voltage (if a battery is installed)
- 
Fill level indicator: water
 Displays the fresh water tank level in multiple levels
- 
Contact
 Installed on the windows and/or the skylight to show their open/closed status
- 
Temperature
 Displays the current temperature in the fridge or interior

Suitable for winter use: at an outside temperature of 0°C, the vehicle's interior can be permanently heated to 20°C.

Winterproof: it must be possible to heat a completely cold vehicle from -15°C to +20°C in just four hours.

Detailed information about our winterised caravans can be found at:
